<b>1)</b>  Find area of square having each side (s) equals 60 in Answer: _____	<b>2)</b>  Find area of square having each side (s) equals 97 in Answer: _____	<b>3)</b>  Find area of square having each side (s) equals 87 m Answer: _____
<b>4)</b>  Find area of square having each side (s) equals 12 in Answer: _____	<b>5)</b>  Find area of square having each side (s) equals 83 ft Answer: _____	<b>6)</b> $\frac{6}{19} + \frac{7}{19}$ Answer: _____
<b>7)</b>  Find area of square having each side (s) equals 100 in Answer: _____	<b>8)</b> $\frac{10}{15} + \frac{2}{15}$ Answer: _____	<b>9)</b>  Find area of square having each side (s) equals 78 ft Answer: _____
<b>10)</b> $\frac{1}{6} + \frac{3}{20}$ Answer: _____	<b>11)</b> $\frac{1}{19} + \frac{6}{18}$ Answer: _____	<b>12)</b>  Find area of square having each side (s) equals 56 ft Answer: _____
<b>13)</b>  Find area of square having each side (s) equals 54 in Answer: _____	<b>14)</b>  Find area of square having each side (s) equals 91 ft Answer: _____	<b>15)</b> $\frac{8}{16} + \frac{9}{20}$ Answer: _____
<b>16)</b> $\frac{6}{13} + \frac{7}{19}$ Answer: _____	<b>17)</b>  Find area of square having each side (s) equals 61 ft Answer: _____	<b>18)</b>  Find area of square having each side (s) equals 87 cm Answer: _____
<b>19)</b>  Find area of square having each side (s) equals 84 ft Answer: _____	<b>20)</b> $\frac{2}{11} + \frac{5}{9}$ Answer: _____
