$\qquad$

1) A number is chosen at random from 1
to 25 . Find the probability of selecting multiples of 9 and 10 .

Answer: $\qquad$
4) A number is chosen at random from 1 to 25 . Find the probability of selecting even number.

Answer: $\qquad$
7) A number is chosen at random from 1 to 25 . Find the probability of selecting number less than 6.

Answer: $\qquad$
10) A number is chosen at random from 1 to 25 . Find the probability of selecting multiples of 9 .

Answer: $\qquad$

## Total: <br> $\qquad$ / 10

2) A number is chosen at random from 1 to 25 . Find the probability of selecting factors of 9 and 10 .

## Answer:

$\qquad$
5) A number is chosen at random from 1 to 25 . Find the probability of selecting divisors of 8 .

## Answer:

$\qquad$
8) A number is chosen at random from 1 to 25 . Find the probability of selecting factors of 10 and 7.
3) A number is chosen at random from 1 to 25 . Find the probability of selecting divisors of 9 .

Answer: $\qquad$
6) A number is chosen at random from 1 to 25 . Find the probability of selecting multiples of 7 .

Answer: $\qquad$
9) A number is chosen at random from 1 to 25 . Find the probability of selecting prime number.

Answer: $\qquad$
$\qquad$

## Answers:

1) $4 / 25$
2) $\%$
3) $3 / 25$
4) $12 / 25$
5) $4 / 25$
6) $3 / 25$
7) $1 / 5$
8) $\%$
9) $19 / 25$
10) $2 / 25$
