$\qquad$

4) A number was shared in the ratio $4: 2$. The larger share was 14 . What was the smaller amount?

Answer $\qquad$
7) A number was shared in the ratio $8: 1$. The smaller share was 13 . What was the total amount shared?

Answer: $\qquad$
10) A number was shared in the ratio $5: 10$. The smaller share was 19 . What was the larger amount?
nswer: $\qquad$
13) A number was shared in the ratio 9:3. The smaller share was 9 . What was the total amount shared?
2) A number was shared in the ratio 1:9. The smaller share was 18 . What was the larger amount?

## Answer:

$\qquad$
5) A number was shared in the ratio $9: 3$. The smaller share was 11 . What was the total amount shared?

## Answer:

$\qquad$
8) A number was shared in the ratio 3:9. The smaller share was 20 . What was the larger amount?

Answer: $\qquad$
11) A number was shared in the ratio $8: 4$. The smaller share was 13 . What was the total amount shared?
nswer: $\qquad$
14) A number was shared in the ratio $1: 8$. The smaller share was 6 . What was the larger amount?
3) A number was shared in the ratio $1: 9$. The smaller share was 18 . What was the total amount shared?

Answer: $\qquad$
6) A number was shared in the ratio 3:2. The smaller share was 18 . What was the total amount shared?

## Answer:

$\qquad$
9) A number was shared in the ratio $5: 10$. The smaller share was 16 . What was the larger amount?

Answer: $\qquad$
12) A number was shared in the ratio $10: 5$. The larger share was 10 . What was the smaller amount?

Answer: $\qquad$
15) A number was shared in the ratio 6:2. The smaller share was 17 . What was the total amount shared?

Answer: $\qquad$

Answer: $\qquad$

Answer: $\qquad$
16) A number was shared in the ratio 6:10. The larger share was 5 . What was the smaller amount?

Answer: $\qquad$
19) A number was shared in the ratio $1: 3$. The smaller share was 14 . What was the total amount shared?
17) A number was shared in the ratio 6:3. The smaller share was 14 . What was the larger amount?
18) A number was shared in the ratio $8: 10$. The larger share was 20 . What was the smaller amount?

Answer: $\qquad$
20) A number was shared in the ratio $6: 1$. The smaller share was 17 . What was the total amount shared?

Answer: $\qquad$

Answer: $\qquad$

Total: / 20

## Answers:

| 1) 57 | 2) 162 | 3) 180 | 4) 7 | 5) 44 | 6) 45 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 8) 60 | 9) 32 | 10) 38 | 11) 39 | 12) 5 | 13) 36 |
| $15) 68$ | 16) 3 | 17) 28 | 18) 16 | 19) 56 | 20) 119 |
